HCMM Energy Budget Data As A Model Input For
Assessing Regions Of High Potential Groundwater Pollution

Principal Investigator: Donald G. Moore

Report Authors: J. Heilman and D. Moore

Remote Sensing Institute
South Dakota State University
Brookings, South Dakota 57007

(E78-10111) HCMM ENERGY BUDGET DATA AS A
MODEL INPUT FOR ASSESSING REGIONS OF HIGH
POTENTIAL GROUNDWATER POLLUTION Interim
Report, Jan. - Mar. 1978 (South Dakota State
Univ.) 4 p HC A02/MF A01

March 1978

Interim Type II Report for Period January-March 1978

Prepared for:

Goddard Space Flight Center
Greenbelt, Maryland 20771

TECHNICAL REPORT STANDARD TITLE PAGE

1. Report No. Third Quarterly		2. Government Accession No.		3. Recipient's Catalog No.	
4. Title and Subtitle HCMM Energy Budget Data as a Model Input for Assessing Regions of High Potential Groundwater Pollution				5. Report Date March, 1978	
				6. Performing Organization Code	
7. Author(s) Heilman, J. and D. Moore				8. Performing Organization Report No.	
9. Performing Organization Name and Address Remote Sensing Institute South Dakota State University Brookings, South Dakota 57007				10. Work Unit No.	
				11. Contract or Grant No. NAS5-24206	
12. Sponsoring Agency Name and Address NASA Goddard Space Flight Center Fred Gordon - Technical Office Greenbelt, MD 20771				13. Type of Report and Period Covered Type II January-March, 1978	
				14. Sponsoring Agency Code	
15. Supplementary Notes					
16. Abstract <p>Progress of the investigation is reported. Field measurements and analysis of soils information have begun in preparation of HCMM launch.</p>					
17. Key Words Suggested by Author HCMM, Thermal Inertia, Water Table, Finite-difference, Heat Flow Model				18. Distribution Statement	
19. Security Classif. (of this report) Unclassified	20. Security Classif. (of this page) Unclassified		21. No. of Pages 2	22. Price	

A. Problems

None

B. Accomplishments

All data from October and November, 1977, WB-57F and U-2 over-flights have been received.

Intensive test sites in eastern South Dakota have been selected. Soils information and farmer interviews are being used to select test fields within the sites for soil-temperature, soil moisture, water-table depth and vegetation measurements. Personnel from East Dakota Conservancy Subdistrict have begun monitoring 170 observation wells for determining water table depths. Other measurements will begin within the next three weeks.

Soil association information for eastern South Dakota is being coded into a geographic data base (0.5 x 0.5 km cell size) to be used in the interpretation of HCMM data.

During the next reporting period, the finite-difference heat-flow model will be calibrated for the intensive test sites. Evaluation of ground, aircraft, and satellite data will begin to evaluate HCMM temperature and thermal inertia data for assessing regions of shallow water tables.

C. Significant Results

None at this time

D. Publication

None at this time

E. Recommendations

None at this time

F. Funds expended

\$12,632

G. Data Utility

Analysis of the aircraft data has not been completed.
